Hero Section

Badge: Now with Premium Voice & AI Agent

Health care that **feels like family**

Nora is your warm, intelligent health companion — talk naturally, manage medications by voice, record doctor visits, and stay connected with your loved ones. Powered by Claude AI.

Primary Button: Talk to Nora

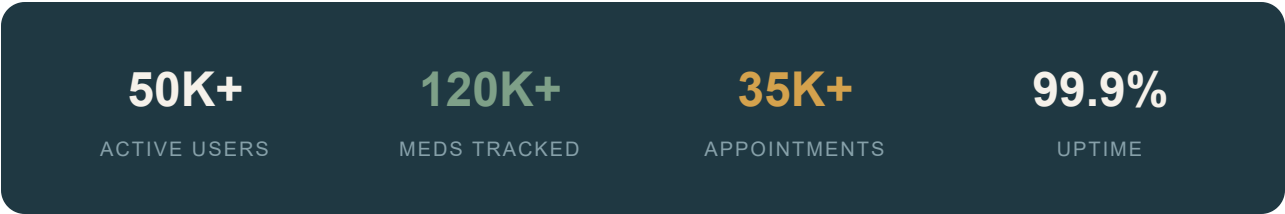

Secondary Button: See How It Works

Phone Mockup Shows: Voice call interface with waveform animation, "Nora is speaking..." state, tap-to-talk mic button, bottom tab navigation (Home, Calendar, Nora, Medications, Settings)

Floating Cards:

- Dr. Martin — Recorded / AI Summary Ready
- "Add Aspirin 500mg" / Done via voice
- Emergency / One-tap call

Stats Section

What Nora Can Do

Section Headline: Care, simplified

Subtext: Nine powerful features designed with warmth — from voice-first AI interactions to hands-free doctor recordings, all built for comfort and clarity.

Premium Voice Chat NEW

Talk naturally with Nora using tap-to-speak. She responds with a warm, human-like voice powered by AWS Polly's generative engine — with sentence-level streaming for instant replies.

AI Agent Actions NEW

Just say "Add Aspirin 500mg twice daily" or "Set a meditation at 3pm" — Nora executes it directly. Powered by Claude Sonnet, she manages meds, reminders, and contacts from chat.

Doctor Visit Recording NEW

Record your doctor appointments hands-free. Nora auto-transcribes the conversation and generates an AI-powered summary you can review anytime.

Medication Management

Scan medication boxes with your camera or add them by voice. Smart scheduling with hourly intervals, gentle reminders, and a progress ring to track your day.

Agenda & Appointments

Your daily view with medications, consultations, and reminders — all in one place. Swipe through days, see your progress, and never miss an appointment.

Emergency Contacts

One-tap emergency calling with a pulsing button that draws attention. Manage trusted contacts with phone and email — always within reach.

Family Check-In NEW

Daily notifications keep loved ones connected. Family members get peace of mind knowing their parent or grandparent is doing well.

Full Accessibility

Adjustable font sizes, high-contrast mode, haptic feedback, and 56-72px tap targets. No passwords needed — just your name to log back in.

Bilingual Support

Full English and Spanish interface. Nora speaks in your preferred language with a native-sounding voice (Ruth for English, Lucia for Spanish).

Features Section

Headline: Voice-first, action-ready

Subtext: Nora doesn't just listen — she acts. Powered by Claude Sonnet and AWS Polly, every interaction feels natural, warm, and gets things done.

Feature Checklist

- ✓ Tap-to-talk voice interface
- ✓ Medication photo scanning
- ✓ AI-powered visit summaries
- ✓ No-password login by name
- ✓ Sentence-level streaming TTS
- ✓ Doctor visit auto-transcription
- ✓ Hourly to weekly schedules
- ✓ Family daily check-in alerts

App Preview Content (Interactive Mockup)

Chat Preview:

Nora: "Good morning! I've added Aspirin 500mg to your 8 AM schedule."

User (via mic): "Set a reminder for my vitamin too"

Nora: "Done! Vitamin D reminder set for 9 AM daily. Anything else?"

Doctor Recording Preview:

"...your blood pressure looks good. Let's continue with the current dosage and check again in 3 months..."

[Recording indicator] — Progress: 12:34

Daily Progress: 3 of 4 medications taken — 75% (progress ring)

How Nora Works

Headline: From voice to action in seconds

STEP 01

Talk to Nora

Tap the mic and speak naturally — "I need to add my new prescription" or "What's my schedule today?"
Nora understands context and takes action.

STEP 02**Nora Takes Action**

She adds your medication, sets the reminder, books the appointment — all from your voice command. No menus, no typing needed.

STEP 03**Record & Remember**

At your next doctor visit, tap record. Nora captures everything, transcribes it, and creates a summary you can review with family.

STEP 04**Stay Connected**

Your family gets daily check-in notifications. Emergency contacts are always one tap away. Everyone stays in the loop.

Give your loved ones the care they deserve

Whether for yourself or a family member — Nora is a companion that brings peace of mind, gentle reminders, and real support. Now with premium voice, AI actions, and doctor visit recording.

Primary: "Get Nora — It's Free" | Secondary: "Learn More"

Trust Badges: Premium Voice (Natural, streaming TTS) | Claude Sonnet AI (Takes action from voice) | Doctor Recording (Auto-transcribe & summarize)

Testimonials

Headline: Loved by families everywhere

"I set up Nora for my mother and it changed everything. She never misses her medications anymore, and I get peace of mind knowing she can reach me in one tap."

Catherine Moreau

Daughter & Caregiver

"I recommend Nora to my elderly patients. The medication tracking and large interface make it perfect for those who struggle with typical health apps."

Dr. Philippe Laurent

Geriatric Physician

"Nora feels like talking to a kind friend. She reminds me of my pills, helps me remember my appointments, and the text is big enough that I can read without my glasses!"

Marie Bellanger

User, age 74

"The emergency button saved me once already. I fell and was able to call my son immediately. The app is so simple — even I can use it without help."

Jean-Pierre Duval

User, age 68

"Papa takes 6 different medications. Before Nora, he mixed them up constantly. Now everything is organized and tracked. Such a relief for our family."

Sophie Martin

Daughter & Caregiver

"The accessibility features are outstanding. High contrast, large touch targets, voice input — this is how all health apps should be designed for older adults."

Dr. Amira Hassan

Family Medicine

FAQ Section

Headline: Questions? We're here.

Subtext: Everything you need to know about Nora. Can't find your answer? We'd love to hear from you.

Q: Who is Nora designed for?

Nora is designed primarily for older adults and their caregivers. The interface uses large text (minimum 16px body, 18-20px for buttons), generous tap targets (56-72px), haptic feedback, and high contrast options. No passwords are needed — just your name to log back in.

Q: How does the voice feature work?

Nora uses a tap-to-talk interface — press the microphone button, speak naturally, and Nora responds with a warm, human-like voice powered by AWS Polly's generative engine. The response streams sentence-by-sentence so you hear the first part immediately. You can say things like "Add my new medication" or "What's my schedule today" and Nora takes action directly.

Q: What can Nora actually do from my voice?

Nora is powered by Claude Sonnet AI and can execute real actions from your voice: add or edit medications, set reminders, schedule meditation sessions, add doctor consultations, manage emergency contacts, and mark medications as taken. She understands natural language — no special commands needed.

Q: How does doctor visit recording work?

When you're at a doctor's appointment, tap the record button. Nora captures the conversation hands-free, automatically transcribes it, and generates an AI-powered summary. You can review past consultations, listen to recordings, and share summaries with family members.

Q: Can my family stay connected?

Yes! Family members can set up Nora for their loved ones and receive daily check-in notifications. You can configure trusted contacts with phone and email, and the emergency calling feature is always one tap away. The app is designed to be set up by a tech-savvy family member and used independently.

Q: What about my privacy and data?

Your health data stays on your device by default. We use end-to-end encryption for any data that syncs. We never sell personal information and you can delete all your data at any time from Settings. Doctor recordings and transcriptions are stored securely on your device.

Q: Does it work without internet?

Core features like medication reminders, your agenda, and emergency calling work offline. Voice chat and AI agent features require an internet connection, but your medication schedule, doctor recordings, and contact list are always available even without signal.

Q: What languages does Nora support?

Nora currently supports English and Spanish with full interface translation and native-sounding voices (Ruth for English, Lucia for Spanish via AWS Polly). More languages are planned. You can switch languages anytime from Settings.
